Affidavit of Publication

STATE OF UTAH,

SS.

DIVISION OF OIL
GAS & MINING

County of Salt Lake

ORDER TO SHOW CAUSE

NO. ACT/053/004

BEFORE THE BOARD OF OIL, GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
IN AND FOR THE STATE OF UTAHIN THE MATTER OF APPROVAL OF THE NOTICE OF INTENT
AND RECLAMATION PLAN SUBMITTED BY ST. GEORGE
MINING CORPORATION, WASHINGTON COUNTY, UTAHTHE STATE OF UTAH TO ALL OPERATORS, TAKERS OF
PRODUCTION, MINERAL AND ROYALTY OWNERS, AND
PARTICULARLY ALL PERSONS INTERESTED IN TOWNSHIP
43 SOUTH, RANGE 17 WEST, SECTIONS 6 AND 7 AND TOWNSHIP
43 SOUTH, RANGE 18 WEST, SECTIONS 1 AND 12, WASH-
INGTON COUNTY, UTAH.Notice is hereby given that tentative approval was given by
the Division of Oil, Gas and Mining, on June 21, 1984, to St.
George Mining Corporation to mine gallium, germanium, cop-
per, zinc and silver in Township 43 South, Range 17 West, Sec-
tions 6 and 7, and Township 43 South, Range 18 West, Sections 1
and 12, Washington County, Utah. The name of the mine is the
Apex Project, and the person representing the company in this
matter is Mr. H. Lutz Kilgamon, President and Director, 50 East
100 South, St. George, Utah, 84770.St. George Mining Corporation has fulfilled obligations un-
der the Utah Mined Land Reclamation Act of 1975 (Section 40-8,
UCA, 1953, as amended), and will employ the following mining
and reclamation practices on approximately eight acres of pat-
ented Mineral Claims and Unpatented Claims owned by St.
George Mining Corporation.

During Operations:

1. St. George Mining Corporation will reactivate the old
Apex Mine in order to produce gallium, germanium, copper,
zinc and silver. The old mine is being rehabilitated and a sur-
face cleanup program has been initiated.2. The present underground mining method is a mecha-
nized cut and pneumatic fill. Duration of mining operations at
the Apex Project site is estimated to be 13 years.3. Ore will be transported to the surface, screened, crushed
and hauled off-site for a distance of 7.5 miles to the processing
facility which is on the Shivwits Indian Reservation.4. Working stockpiles of ore, low grade ore and mine
wastes will be maintained on-site. Waste rock generated during
underground mining will be crushed, screened and used as
pneumatic fill for ground support in the mine. In addition to ore
produced during mining, the existing upper mine dump contain-
ing low grade ore will be reclaimed.

After Operations:

1. All salvageable equipment and buildings will be re-
moved, portals will be sealed and scoured and foundations will
be broken up and disposed of in the waste dump. Powerlines
directly supplying the mine will be removed.2. The site will be graded to blend with the natural topogra-
phy and all flat surfaces will be scarified. The existing upper
dump area will be graded down to the original limestone out-
crop surface.3. Disturbed areas, included roads, will be mulched, fertil-
ized and revegetated. Currently proposed revegetation meth-
ods will be tested on the upper dump area during years 3 and 4
of operations and monitored for three years to determine suc-
cess and modify the final reclamation procedures, if indicated.Reclamation performance surety acceptable to the Board
of Oil, Gas and Mining will be established prior to issuing final
approval of the mining and reclamation plan.Any person or agency aggrieved by this tentative decision
is hereby required to submit written protest within 30 days of
the date of publication to the Division of Oil, Gas and Mining,
4241 State Office Building, Salt Lake City, Utah, 84114, to the
attention of Mary Boucek, setting forth factual reasons for their
complaint and thereafter, at a time and place to be established,
appear before the Board of Oil, Gas and Mining to show cause, if
any, why this plan should not be approved.

DATED this 21st day of June, 1984.

STATE OF UTAH
BOARD OF OIL, GAS AND MINING
